PROFESSIONAL SUMMARY

AI/ML undergraduate (CGPA: 8.03) with experience in MERN stack development, REST API engineering, and backend systems. Built full-stack applications with secure authentication, MongoDB aggregations, and AI-powered features using Google Gemini API. Solved 250+ DSA problems and contributing to GSSoC 2026.

EDUCATION

ABES Engineering College (AKTU) | B.Tech — CSE (AI/ML)

CGPA: **8.03 / 10.0**

Sept 2023 – Present
Ghaziabad, Uttar Pradesh

Jawahar Navodaya Vidyalaya, Bijnor | Class XII — Science (CBSE)

Score: **87%**

2022 – 2023

Jawahar Navodaya Vidyalaya, Bijnor | Class X — CBSE

Score: **99.6%**

2020 – 2021

TECHNICAL SKILLS

Languages: C++, JavaScript, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API Design

Databases: MongoDB, MySQL (Joins, Filtering, CRUD)

Testing & Deployment: Postman, API Testing, Vercel, Render

Tools & Practices: Git, GitHub, SDLC, WireShark, VS Code, Debugging

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

EduAI : AI-Powered Learning & Interview Preparation Assistant | Full-Stack Development *Oct 2025 – Jan 2026*

MERN Stack 🐙 GitHub 🌐 Live demo

- Built an AI-powered interview preparation platform using the MERN stack and Google Gemini API for dynamic question generation and real-time answer evaluation.
- Developed 10+ REST APIs to handle authentication, interview sessions, response evaluation, and user progress tracking across the platform.
- Tested backend APIs using Postman by checking authentication flows, invalid inputs, edge cases, and API response handling to improve reliability and consistency.
- Fixed JWT authentication issues and improved backend validation and error handling, making the application more secure, stable, and easier to debug.

FinTrack : Financial Transaction Management System | Full-Stack Development

Jan 2025 – Mar 2025

MERN Stack 🐙 GitHub 🌐 Live demo

- Developed a financial transaction management system using the MERN stack with secure JWT authentication and role-based access control.
- Built REST APIs for managing transactions, categories, and user accounts with complete CRUD functionality and structured backend workflows.
- Implemented transaction filtering and MongoDB aggregation pipelines to generate spending summaries and category-wise financial insights.
- Improved backend performance and stability by optimizing MongoDB queries, reducing redundant database operations, and handling runtime errors effectively.

CERTIFICATIONS

- **AWS Academy Cloud Foundations** — AWS services, cloud computing fundamentals, and deployment concepts.
- **AI Prompt Engineering** — Prompt optimization techniques for large language model applications.
- **Mission Upskill India** — Industry-focused hackathon and technical skill development program.
- **AI Fundamentals** — Machine learning, neural networks, and core AI concepts.

ACHIEVEMENTS

- **GSSoC 2026 — Selected Contributor 🌐** : Chosen for GirlScript Summer of Code 2026, a globally competitive 3-month open-source program by GirlScript Foundation, contributing to real-world projects under experienced mentors alongside developers worldwide.
- **Competitive Programming:** Solved 250+ DSA problems on LeetCode, CodeChef, and GeeksforGeeks with LeetCode Rating — 1550+ 📈, demonstrating strong command over algorithms and data structures.
