PROFESSIONAL SUMMARY

AI/ML undergraduate (CGPA: 8.03) with hands-on experience in full-stack MERN development, REST API engineering, and QA testing. Skilled in building and validating backend systems using Node.js, Express.js, MongoDB, and Postman. GSSoC 2026 Selected Contributor with 250+ DSA problems solved, seeking a high-impact software engineering role.

EDUCATION

ABES Engineering College (AKTU) | B.Tech — CSE (AI/ML)
CGPA: 8.03 / 10.0

Sept 2023 – Present
Ghaziabad, Uttar Pradesh

Jawahar Navodaya Vidyalaya, Bijnor | Class XII — Science (CBSE)
Score: 87%

2022 – 2023

Jawahar Navodaya Vidyalaya, Bijnor | Class X — CBSE
Score: 99.6%

2020 – 2021

TECHNICAL SKILLS

Languages: C++, JavaScript, Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST API Design
Databases: MongoDB, MySQL (Joins, Filtering, CRUD)
Testing & QA: Postman, Test Case Design, Edge Case Analysis, Data Validation
Tools & Practices: Git, GitHub, SDLC, VS Code, OOP, Debugging

PROJECTS

EduAI : AI-Powered Learning & Interview Preparation Assistant | Full-Stack Development
MERN Stack 🐙 GitHub 🌐 Live demo

Oct 2025 – Jan 2026

- Architected 10+ REST APIs for dynamic question generation and AI-driven response evaluation, integrating Google Gemini API to power real-time adaptive interview sessions.
- Designed and executed a comprehensive test suite across 30+ endpoint configurations using Postman, covering positive, negative, and boundary scenarios including missing fields and malformed JSON.
- Diagnosed and resolved JWT authentication bugs and backend logic defects, improving session reliability; implemented rubric-based answer scoring for structured, traceable user feedback.
- Implemented input validation and centralized error-handling middleware, improving API robustness, maintainability, and debugging efficiency across all backend services.

FinTrack : Financial Transaction Management System | Full-Stack Development
MERN Stack 🐙 GitHub 🌐 Live demo

Jan 2025 – Mar 2025

- Built a production-grade RESTful API managing transactions, categories, and user accounts with full CRUD operations and role-based access control.
- Authored systematic test cases validating HTTP status codes, response schemas, and business-logic constraints across edge conditions including empty datasets and out-of-range values.
- Debugged runtime exceptions in Express.js middleware and MongoDB aggregation pipelines; restructured error payloads to standardized responses, improving REST conformance.
- Optimized MongoDB query performance and reduced redundant database operations, improving backend response consistency and overall application stability.

CERTIFICATIONS

- AWS Academy Cloud Foundations** — Learned AWS services and cloud deployment fundamentals.
- AI Prompt Engineering** — Explored prompt optimization techniques for effective large language model interactions.
- Data Science and Python** — Learned Python, data analysis, visualization, and basic machine learning concepts.
- Mission Upskill India** — Completed industry-focused technical Hackathon program for improving development skills.
- AI Fundamentals** — Studied AI concepts, neural networks, machine learning, and real-world applications.

ACHIEVEMENTS

- GSSoC 2026 — Selected Contributor 🌐** : Chosen for GirlScript Summer of Code 2026, a globally competitive 3-month open-source program by GirlScript Foundation, contributing to real-world projects under experienced mentors alongside developers worldwide.
- Competitive Programming:** Solved 250+ DSA problems on LeetCode, CodeChef, and GeeksforGeeks with LeetCode Rating — 1550+ 📈, demonstrating strong command over algorithms and data structures.
